### **DETAILED ACTION**

The following is an examiner's statement of reasons for allowance: The prior art made of record, namely Guye (2,688,970) or Garstein (2002/0045859), did not disclose or render obvious the method disclosed in claim 25. Neither reference discloses the step of rotating at least one radial array of abrading frustoconical microprotrusions wherein said at least one microprotrusion array further comprises at least one platen, said platen comprising a microprotrusion surface having a plurality of microprotrusions attached thereon, and a platen edge having a thickness, wherein said at least one platen includes at least one microchannel comprising at least one portion devoid of microprotrusions radially extending from the center of the platen to the edge of the platen and having a substantially constant width in combination with the other limitations recited in claim 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The Examiner mistakenly left the reference, US 6,835,184 to Sage et al., out of the PTO-892, Notice of References Cited form. This reference also does not anticipate or render obvious the claims as currently recited. The reference will be included in the instant PTO-892 so that it is made part of the record.
